Our Department

The Map and Cadastre Program, which was opened in 2000 under the Department of Technical Programs of the Kahta Vocational School of Harran University, carried out its educational activities under the Department of Technical Programs of Adiyaman University Kahta Vocational School after the establishment of Adiyaman University in 2006. In 2009, within the scope of the IKMEP Project prepared by Council of Higher Education (YÖK) for Vocational Schools and the Bologna Process, a new classification was made according to the International Standard Classification of Education (ISCED-97) International and International Standard Classification of Occupations (ISCO-88) made the classification of departments and programs. Accordingly, the Map and Cadastre Program is affiliated with the 581 Code Architecture and Urban Planning Department. In accordance with this structuring, the Department of Architecture and Urban Planning was established in Adiyaman University Kahta

Vocational School in 2010 and the “Map and Cadastre Program” was connected to this department.

• Mission & Vision

Mission

Mission of Map and Cadaster Technician; It is the realization of the services summarized above, in line with the needs and expectations of the society, in a quality that goes beyond these expectations, sensitively complying with the profession and ethical rules.

Vision

Map and Cadastre Technician is a professional discipline that produces location information or spatial information, and it assumes an important responsibility in terms of social life with the services it produces in cooperation and coordination with many disciplines. The vision of our profession is to provide services in accordance with professional ethical rules, by adopting a fair balance of republic-

individual benefit as a principle, to use the developing technological methods and measuring tools in professional practices in the most effective way, to evaluate today in the light of current conditions, and to reveal predictions and targets for the future..

Importance of Departments of Architecture and Urban Planning

The task of the Map and Cadastre Technician is to collect and evaluate the geometric and thematic information about the natural and artificial land details regarding the whole or a part of the earth, to manage and serve the information in an electronic environment with a system approach, in a projection system suitable for the desired purpose on a certain scale. It is to present it to the users as a drawing and at the same time to establish the relations between the environment where the spatial information is stored and the land. In this respect, our profession; In activities such as city planning, rural and urban land arrangements, construction, forestry, mining, it provides the required data of the land together with many engineering disciplines related to the land, providing the necessary services both interdisciplinary and related institutions, organizations and individuals in the construction and implementation of their projects..

The logo of Adiyaman University is a large, light blue circular emblem. It features a stylized sun or flower-like shape in the center, with rays extending outwards. The words "ADIYAMAN UNIVERSITY" are written in a semi-circle along the top edge, and the year "2006" is at the bottom. The text "Why Department of Architecture and Urban Planning?" is overlaid in the center of the logo in a bold, purple font.

Why Department of Architecture and Urban Planning?

Today, the need for the profession of Map and Cadastre Technician comes to the fore, as the efforts to complete the cadastre of our country or to re-update the previously completed areas are on the agenda as priority.

Job Opportunities for Our Graduate Students

The fact that at least two Map and Cadastre Technicians will be legally employed in hundreds of licensed mapping offices that have been implemented recently makes this profession important. Accordingly, Map and Cadastre Technicians take part in the preparations of land maps, information and documents and the implementation of the prepared projects on the land. Map and Cadastre Technicians; There are employment opportunities in almost all of the many public and legal institutions such as General Directorate of Land Registry and Cadastre, General Directorate of Highways, Ilbank, General Directorate of State Hydraulic Works, Municipalities.
